FREE, ONLINE PROGRAMMING CLASSES AVAILABLE 24/7

Online introductory programming classes for HPCC Systems, featuring open source, end to end big data in a massively scalable super computing platform.

BENEFITS OF HPCC SYSTEMS:

- **Proven:** Used for over a decade by LexisNexis Risk Solutions to scale its data-intensive, multi-billion dollar information solutions business.
- **Open Source:** Apache licensed, open source system that runs on commodity hardware.
- **Easy to use:** A complete end to end system with integration to most popular big data platforms.
- **Time saving:** High-level, declarative programming language allows you to program the “what” not the “how” in less lines of code.
- **Productivity:** Enables massive joins, merges, sorts, batch jobs, and data transformations to solve tough data challenges.

BENEFITS OF ATTENDING:

- **Professional development at your own pace:** Attend class as your schedule allows.
- **Increase your proficiency of solving Big Data challenges:** Successive classes gradually build your expertise.
- **Be a part of a growing community:** Meet other programmers and share your experience, trade tips and tricks.
- **Free:** Fits all budgets.

“Self-paced, repeatable and available for future reference – LexisNexis online courses for HPCC Systems are all of this and more. The videos are well-structured, elaborate and contain the right mix of neatly explained theory and lab exercises. Supplemented by language documents available on the hpccsystems.com site, the online courses surely are the best way to fast track the learning process.”
